

CIRCIE 2019

Challenges for the Islands in the era of the Circular Economy

***Research Collaboration with the Public Works Department
and the KIOS Research Centre of Innovation and Excellence***

Anixi Antonakoudi

*KIOS Research Centre of Innovation and Excellence,
University of Cyprus*

Under the auspices of

SMile 2019

6th Sustainable Mobility & Intelligent Transport conference

Agenda

- Introduction & Background
 - KIOS CoE
 - Innovation Hub
 - Department of Public Works & KIOS Collaboration
- GNOSIS: System for monitoring, control and management of the road network
 - Open Environment
 - Other Data Sources
 - Examples of Use Cases

Name Origin

Greek mythology: “Kios” from the Greek *Koĩos* (Kee-os), was the Titan of inquisitive mind and the questioning intelligence

Vision and Mission

- To conduct multidisciplinary research and innovation in the area of Information and Communication Technologies (ICT) with emphasis on the Monitoring, Control, Security and Management of Critical Infrastructures
- To provide an inspiring environment for conducting excellent, cutting-edge research at a global scale, producing new knowledge that can be applied to solve timely and real-life problems in the considered Critical Infrastructure Systems (CIS)

CirCIE 2019

**Challenges
for the Islands
in the era of
the Circular Economy**

under the auspices of

KIOS CoE

Research Centre of Innovation and Excellence

- Center of Excellence conducting cutting-edge multidisciplinary research and innovation in the area of Information and Communication Technologies (ICT)
- Strategic Partnership between University of Cyprus and Imperial College London

Specialization

- Intelligent monitoring, control, management and security of complex, large-scale, dynamical systems

Application Areas

- Critical Infrastructure Systems

Intelligent transportation systems

Telecommunication systems & networks

Energy & power systems

Emergency management response

Water systems & environmental monitoring

SMile 2019

**6th Sustainable Mobility
& Intelligent Transport
conference**

KIOS CoE

Core Assets & Capabilities

- Knowledge:

- Best paper awards, publications in top journals, international recognition in fields of research, organization of high profile research conferences

- People

- Currently 113 people employed by KIOS CoE
- To expand to 200 by 2022

- Infrastructure

- State of the Art facilities
- Testbeds

KIOS CoE

Supports and Enables

Technology Transfer to Industry | Collaboration with Industry | Commercial exploitation of R&D&I | Economic development in Cyprus

CirCIE 2019

**Challenges
for the Islands
in the era of
the Circular Economy**

under the auspices of

University of Cyprus & Ministry of Transport MoU

**MINISTRY OF TRANSPORT,
COMMUNICATIONS AND WORKS**

**University
of Cyprus**

Collaboration Objectives:

- Promote joint programs, studies and surveys to understand and / or address transport and infrastructure problems by using new information and communication technologies
- Joint participation in research programs funded by the European Research Promotion Foundation, and by other research funding bodies.
- Exchange of information on European Union issues and cooperation with other relevant scientific forums on transport, projects and electronic communications.
- Providing education from the University of Cyprus to members of the Ministry of Transport, Communications and Works.

SMile 2019

**6th Sustainable Mobility
& Intelligent Transport
conference**

Public Works Department & KIOS CoE Collaboration

**PUBLIC WORKS
DEPARTMENT**

Sustainable Mobility Unit

- Utilization of data from multiple sources
- Data fusion and use of monitoring, control and fault diagnosis techniques and algorithms
 - Improving Management of the Road Network Infrastructure of Cyprus

“Openness” of GNOSIS

- Using only open source software contributing at the same time to the community
- Supporting actions and initiatives to disseminate results to the public
- Reuse of open available data

PostgreSQL

PostGIS

QGIS

python™

django

TRIFACTA

inspiregis

GeoKettle
Open Source Spatial ETL

hale

Project Data

Projects undertaken by
Sustainable Mobility Unit

- Bus Telematic
- Bus Stops data collection
- Single Point of Access

Utilization of PWD Databases

- PWD road network
- Public Transport
- Sensors
- Data from previous projects
- Traffic models
- Road designs

- Proposed developments
 - Assets
 - Traffic lights
 - Road signs
 - etc.

Additional Data

Other Databases

- Department of Lands and Surveys
- Open Data Cyprus
 - Environment
 - Health
 - etc.
- Cyprus Statistical Service
 - Economy
 - Car registrations
 - Population etc.
- Utilities Databases

GNOSIS: Example of Use Cases

- Traffic state estimation and traffic control
 - Using multiple data sources such as:
 - loop detectors,
 - Bluetooth detectors,
 - cameras etc.

GNOSIS: Example of Use Cases

- Improve quality of sensor data
 - Improving the collected data using techniques like fault diagnosis

Thank you for your attention
